Universal communicators

HW of the receiving side

Universal communicators

PX200N
Universal GPRS/GSM communicator

- ▶ CID format transmission
- ▶ GSM as a backup route
- ▶ Possibility of remote configuration
- ▶ Primary and backup IP address
- ▶ Control of outputs from ARC
- ▶ 8 inputs + 2 outputs
- ▶ Variant with loop balancing
- ▶ Excellent service life and quality

GC-20
Universal GPRS/GSM communicator

- ▶ CID format transmission
- ▶ GSM as a backup route
- ▶ Possibility of remote configuration
- ▶ Primary and backup IP address
- ▶ Control of outputs from ARC
- ▶ Remote configuration
- ▶ 4 inputs + 2 outputs
- ▶ Excellent service life and quality

EX-20
Universal LAN communicator

- ▶ CID format transmission
- ▶ Control of outputs from ARC
- ▶ Primary and backup IP address
- ▶ Remote configuration
- ▶ 4 inputs + 2 outputs
- ▶ Excellent service life and quality

TwinCom
Universal communicator

- ▶ LAN as the primary route
- ▶ GPRS and SMS as a backup route
- ▶ SIA DC-09 and CID format transmission
- ▶ 4+2 format transmission
- ▶ Primary and backup IP address
- ▶ Remote configuration
- ▶ Two balanced programmable inputs
- ▶ Excellent communication security

HW of the receiving side

GSM
Wavecom COM modem

- ▶ Allows you to receive or send SMS
- ▶ Suitable for virtualizing platforms
- ▶ Industrial design
- ▶ Can be used for dialling from ARC
- ▶ Security - one modem is intended for each driver

GSM
Wavecom USB modem

- ▶ Allows you to receive or send SMS
- ▶ Used if there are not enough COM ports
- ▶ Easy installation
- ▶ No external power supply necessary
- ▶ Security - one modem is intended for each driver

GSM
Cinterion COM modem

- ▶ Allows you to receive or send SMS
- ▶ Very sensitive GSM module
- ▶ Suitable for virtualizing platforms
- ▶ Security - one modem is intended for each driver

EXSA Decrypta 4
- phone card

- ▶ Premium Canadian phone card
- ▶ Two lines
- ▶ Support of communication reception in the SIA format
- ▶ Clip detection
- ▶ Security - resistant to interference
